Hi Richard, Thank you for the information and sorry it has taken so long for me to reply. I will get Roy to read these 2 sites and get back to you. Thank you, Ex. 6 - Personal Privacy On Tue, May 1, 2012 at 5:43 AM, Richard Rupert <Rupert.Richard@epamail.epa.gov> wrote:

Good morning,

I hope you are receiving my emails, please let me know that you have received this message. I have not forgotten our conversation and your interest in a simple method to deal with the methane. I found some approaches that have been used successfully in Canada where they have methane and hydrogen sulfide problems. Below are websites with some relatively simple solutions. I hope they help you. I would be very interested in what you finally decide to do. If you do decide to try to install one of the systems I would very much like to see your work. If I can provide any technical assistance please let me know, I would be glad to help.

thanks

Rich

Hi,

During our meeting we discussed a company that had done predrill water testing in the Dimock area.

This company is Farnham & Associates, Inc
